-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Saunders.

See paper 041905, paragraph 2.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saunders in view of Sweeney.

5. Saunders shows the polymer composition of the claims. On page 770, he teaches including fillers in the polymer. He differs from the claims by not specifying fiber filler or showing a multilayer structure.

6. Sweeney shows that, in Table 3-10, fiber fillers improve the properties of polyurethanes.

7. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use fibers as filler in polyurethanes of Saunders in order to improve the properties. A thicker molding of the urethane would be the same as layering two thinner moldings and joining them.

Art Unit: 1711

8. Applicant's arguments filed 12-1-05 have been fully considered but they are not persuasive. The applicants argue that Saunders composition would comprise solvent just as the Elfers reference. Elfers used solvent because he was casting films. In thicker applications, one wouldn't add solvent because it would be too difficult to remove. The Hill reference (3,475,803), which is similar in age to Saunders, states that solvent isn't used when the components are liquid (col. 4, lines 37-39). Furthermore, claims 4-12 don't exclude solvent.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rachel F. Gorr whose telephone number is 571-272-1072. The examiner can normally be reached on Mon., Tues., Thurs., Fri., from 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jim Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
